SUMMARY

A passionate web developer specializing in crafting immersive and user-friendly experiences using cutting-edge JavaScript frameworks. Excited to leverage expertise in **React with Next.js** to bring creativity and functionality to the forefront of web development projects.

EDUCATION

Bachelors in Computer Engineering

Himalaya College Of Engineering / Kathmandu / October, 2019 - Present

TRAINING/CERTIFICATIONS

Python for Data Science

Himalaya College of Engineering , 2022

I've completed training of Python for Data Science which was provided by Himalaya College of Engineering. Here, I learned about basics of data science and also learned about identifying the data-analytics problems that offer the greatest opportunities to the real-world.

The Complete 2022 Web Development Bootcamp

Udemy , 2021

Here, I learnt HTML, CSS, BOOTSTRAP, JavaScript, JQuery, NodeJs, etc from **Angela YU** and did some of the projects from this course.

Python Programming - From Basics to Advanced level

Udemy , 2023

Meta Front-End Developer Course

Coursera , 2022

This is the course offered by Coursera where I learned about the working of HTML, CSS, Bootstrap, JavaScript, React, Basics of UX/UI designing and Version Control.

Meta Back-End Developer Course

Coursera , 2023

This is also a course offered by **Coursera** where I learned to use programming systems including Python Syntax, Linux commands, Git, SQL, Version Control, Cloud Hosting, APIs, JSON, XML and more.

MERN Stack

HCOE, Lalitpur , 2023

This was the course offered by Himalaya College of Engineering by partnering with Broadway Infosys Pvt Ltd where I was able to learn and grasp the knowledge about the development and working of web applications.

PROJECTS INVOLVED

Colour Bump 2D

I've used my programming knowledge and created some games using Unity which are available in the Google Play Store.

<https://play.google.com/store/apps/details?id=com.Bikram.ColourBump2D>

Partnered Projects

I've also worked with different game developers to develop various kinds of games using Unity. Mostly 2D & 3D games (Indie games).

<https://play.google.com/store/apps/details?id=com.srawan.smashcube>

Book Recommendation System

This mobile application was built by our team for the 3rd year's minor project which was based on recommending books available in the college library to the students. In this project, I was involved in backend part building the model for the application and also coordinated in frontend designing.

Created a game for Himalaya Exhibition(HEX) -2023

To make the programme fun, I volunteered in Himalaya Exhibition, 2023, organized by Himalaya College Of Engineering, by making a game in Unity.
